This openMIC barcamp is the 6th in a series of un-conferences for discussion, debate and development of new mobile applications and mobile web services.

i-Med: Serious apps for mobile healthcare

The healthcare sector has identified smartphone as a key delivery technology for quality care. Meanwhile, the mobile industry has identified medical as one of its most valuable emerging markets. However, both medical and mobile service providers need to achieve a transformation in their approach to delivering 'i-Med' services to avoid killer-apps becoming just that...

Wednesday 19th May 2010

Mobilize

Rules of a Bar Camp

- 1st Rule:** You do talk about BarCamp.
- 2nd Rule:** You do blog / tweet about BarCamp.
- 3rd Rule:** If you want to lead a session, you must write your topic and name in a presentation slot.
- 4th Rule:** Only three word intros.
- 5th Rule:** As many break out sessions at a time as facilities allow for.

A Barcamp is... Creative, collaborative, open, dynamic, fun, friendly, streamed to the web,

A Barcamp is NOT... Boring, slideware, a conference, a lecture, protective, passive

Preparing for openMIC

Attendees are encouraged to come to the event with an idea for a mobile application in mind.

Ideas can be commercial or to instigate social or charitable purposes.

Before the event attendees should suggest application and service ideas using the openMIC page at <http://openmicamp.ning.com/>

All ideas suggested are open and owned by the break out group that mobilizes to develop them.

Who should attend: DIY developers, ideas people, operators, innovators - anyone passionate and interested in open group development of new mobile apps for commercial or social use.

The event is **free** to attend, however places are **limited** so please register as quickly as possible to ensure your place.

To join the openMIC Network register @ <http://openmicamp.ning.com/>
and to register your interest in attending this event email: openmicamp@googlemail.com
or Heather Williams: h.williams@bath.ac.uk
